---

- In this document, there are some areas which are shaded for various reasons
  - **RED STRIKETHRU** – Text was deleted or moved to another location
  - **YELLOW** – New text or new programming instructions
  - **GREEN** – Place holder for discussion or new items which are not yet approved, questions or concepts to be revised, areas for discussion.
  - In addition, programming instructions are usually in red text and I'll start them with a comment marker like this
    - **## Hello this is an instruction or comment**

### 1) Pre-Day 0

**## Reminders: HAVE THE VENDOR SEND EMAIL REMINDERS TO TAKE THE SCPC EACH DAY FOR 3 DAYS LEADING UP TO THE DIARY DAY**

**## Send reminder email to the respondent each diary day (0, 1, 2, and 3). The email should remind the respondent to remember to participate in the diary and to log on each night.**

**## Variables to pull in from the SCPC:**

- pa001\_a, pa001\_b, baadopter
  - These are number of checking accounts, number of savings accounts, and flag for bank account adoption
- pa008 questions, dcadopter
  - pa008\_a1, \_a2, \_a3, pa008\_b1, \_b2, \_b3
  - These are the responses to the number of debit cards and number of ATM cards. DCADOPTER is the created variable that controls the flow of later parts of the survey.
- ccadopter
  - This created variable controls the flow of the survey for those respondents with credit cards
- Pcadopter, GPRADOPTER
  - These variables have to do with prepaid cards and general purpose prepaid card adoption.
- moadopter
  - This created variable controls the flow of the survey for those respondents who are money order adopters.
- obbpadopter

- This created variable controls the flow of the survey for those respondents who are online banking bill payment adopters.
- DE013
  - If de013 = 1 then respondent owns primary home, if de013 = 2 then they do not own home.
- pa001\_d1, pa048
  - If pa001\_d1 = YES then the respondent has a Paypal account
  - pa048 asks how the payment account is funded. We are interested in response option 4, “money stored with payment service”

## 2) Day 0 Intro/Welcome screen

IF diarist logs on and SCPC IS INCOMPLETE, THEN SHOW WARNING:

It is important that you take the Survey of Consumer Payment Choice (SCPC) before participating in this Diary.

Please click here to take the SCPC.

After you take the SCPC, you will be able to continue participating this Diary.

*## This “Day 0” section contains items that we need to ask the night before the respondent begins the diary. Items that are in this module are “time sensitive” meaning that they have to be asked before the diarist starts recording their payments and transactions.*

### ## Intro screen

Thank you for agreeing to participate in the 2020 *Diary of Consumer Payment Choice* on  
[ADD SPACE HERE]

**[DISPLAY DIARY DAY 1 HERE, example “Wednesday, October 3”]** to **[DISPLAY DIARY DAY 3 HERE, example “Wednesday, October 3”]**.

[ADD SPACE HERE]

Today,

[ADD SPACE HERE]

**[DISPLAY DIARY DAY 0 HERE, example “Wednesday, October 3”]**,

[ADD SPACE HERE]

you will be answering a 10-minute survey that helps us prepare for your answers during the next three days. Please answer these questions **at the end of the day** today.

Tomorrow,

[ADD SPACE HERE]

**[DISPLAY DIARY DAY 1 HERE, example “Wednesday, October 3”]**,

[ADD SPACE HERE]

we will ask you about purchases, payments, and cash activity. Please record all of payment behavior, including days with zero payments or no cash activity.

### 3) Account ownership – import from SCPC

## This section will be replaced by the Accounts Module in the SCPC. If the respondent has already taken the SCPC, then we don't need to ask any of the questions about account ownership or adoption.

We will import their answers from the SCPC and maybe give them a screen which says "Is everything correct?"

## Here we want to build new variables that are a combination of the SCPC variables if they exist, or the new DCPC variables if they are not missing. We'll use these variables to control the flow of certain questions later in the online diary questionnaire. First we must initialize the variables.

```
dcpc_pa001_a = SCPC variable pa001_a  
dcpc_pa001_b = SCPC variable pa001_b  
dcpc_dcadopter = SCPC variable dcadopter  
dcpc_ccadopter = SCPC variable ccadopter  
dcpc_gpradopter = SCPC variable gpradopter
```

IF diarist has already taken SCPC:

(qday0\_scpcintro)

Previously, you took another survey called the *Survey of Consumer Payment Choice*. In that survey, you told us you:

## display as a table, where each row has one of these lines of text

Have [FILL: pa001_a. if pa001_a = missing then display "0"] checking account(s)
Have [FILL: pa001_b. if pa001_b = missing then display "0"] savings account(s)
IF DCADOPTER = 1 THEN: Have at least one debit card ELSE IF DCADOPTER = (0, missing) THEN: Do not have a debit card
IF CCADOPTER = 1 THEN: Have at least one credit card ELSE IF CCADOPTER = (0, missing) THEN: Do not have a credit card

Is this all correct?

1. Yes

2. No

IF (qday0\_scpcintro = NO or if SCPC has not been completed) then

Here is where the "trail" of questions ends for "Financial services provider". Instead of going back to the payments screen, by way of the screen "Did you make any other purchases today [Diary date]?" the survey should continue on and ask the Payment Instrument Follow-up Questions, which begin down below with question q103f. Then after those questions have been answered, the respondent should see the screen "Did you make any other purchases today [Diary date]?" This should be the case for all the merchant categories from the payment entry screen. We always want to see the Payment instrument follow-ups before we get to the next payment.

  - Music downloads
  - Public transportation
  - Paid with my phone (examples: Uber, Venmo, parking, etc.)
  - Gambling losses
  - Lottery ticket

- Vending machine
- Giving or paying back money to a person

You told us you made the following types of payments, but did not report them earlier:

- [bullet point checked on q98b]

Please record those payments below.

For each box selected in q98b, loop through the payment entry screen and all follow-ups. Keep this text at the top of the payment entry screen until they have finished recording all the payments. After completing the payment module once for each box, ask "Do you have any other [bullet point from q98b] that you would like to report?" If "no," continue to other bullet points (if any). ## 12) Error checking

So far, we have created the following variables:

- amntcashend\_day0
- amntcashpurch
- numcashpurch
- amntcashdeposits
- numcashdeposits
- amntcashwith
- numcashwith
- amntprepaidload
- numprepaidload
- amntcashend\_dayX, where X = [1, 2, 3]

Next, we will create a few intermediate variables.

- amntcashout = sum(amntcashpurch, amntcashdeposits, amntprepaidload)
- amntcashin = amntcashwith
- numcashtrans = sum(numcashpurch, numcashdeposits, numcashwith, numprepaidload)

Now we can create the flag which indicates a good cash identity for Day 1:

- If  $\text{abs}(\text{amntcashend\_day1} - \text{amntcashend\_day0} + \text{amntcashout} - \text{amntcashin}) \leq \text{numcashtrans}$  then goodcashid = 1.
- Else goodcashid = 0.

Likewise, for days 2 and 3, the good cash identity flag is as follows:

- If  $\text{abs}(\text{amntcashend\_dayX} - \text{amntcashend\_day}[X-1] + \text{amntcashout} - \text{amntcashin}) \leq \text{numcashtrans}$  then  $\text{goodcashid} = 1$ .
- Else  $\text{goodcashid} = 0$ .

Create a new variable called `reported_cashend`, which will equal

- $\text{reported\_cashend} = \text{amntcashend\_day}[X-1] - \text{amntcashout} + \text{amntcashin}$
- In other words, the amount of cash at the end of yesterday, minus all cash outflows, plus all cash inflows.

**## New screen -- Only show screen if `goodcashid = 0`, in other words, they have a bad cash identity.**

If `reported_cashend - amntcashend_day[1,2,3]` not equal to 0 THEN

IF `goodcashid = 0` THEN  
(q107)

Are there any other cash activities on **[DISPLAY DIARY DATE HERE, example “Wednesday, October 3”]** that were not reported previously in today’s online diary?

To help you remember, you

**\*\*\*for each of these next text lines, only show if value is > 0\*\*\***  
**## display as table**

Number of cash transactions (includes all cash payments, deposits, and withdrawals)	<code>totcashtrans</code>
Amount of cash you started with in your wallet, purse and/or pocket	$\text{\$}[\text{amntcashend\_day}[0,1,2]]$
Dollar amount of cash payments	$\text{\$}[\text{amntcashpurch}]$
Dollar amount of cash withdrawals	$\text{\$}[\text{amntcashwith}]$
Dollar amount of cash deposits	$\text{\$}[\text{amntcashdeposits}]$
Dollar amount loaded onto prepaid or gift cards	$\text{\$}[\text{amntprepaidload}]$

Based on what you told us about your payments and cash activity today, we calculated that you should have  $\text{\$}[\text{reported\_cashend}]$  in your wallet, purse, and/or pocket. But you told us you ended the day with  $\text{\$}[\text{amntcashend\_day}[1,2,3]]$ .

There is a difference of  $[\text{reported\_cashend} - \text{amntcashend\_day}[1,2,3]]$  dollars

Please help us to understand why your reported cash activity does not match the total shown.

Perhaps you forgot to report some cash payments, withdrawals or deposits. If you are able, please explain in the activities and amounts in the box below.

[provide open ended response text box for the diarist to explain]

### ## Variable names

## How N is defined: The counter N should start at 1 more than the last payment reported in the regular payments section on Day 3. For example, if the respondent had 5 payments on Day 3, their first bill should have N = 6. If the respondent had 0 payments on Day 3, then N = 1.

## Variable names for the bill payment entry screen. These names are the same as the regular payment entry screen, with the exception of bill\_dday\_N.

- bill\_dday\_N
- payamnt\_N
- paymethod\_N
- paylocation\_N
- paydevice\_N
- from\_bill\_section\_N = 1. Set this value equal to 1 when the payment comes from the bills section.

## Here we should do a few things.

- In the bill section, the counter “N” should be set to be 1 more than the last payment reported on Day 3
- The new variable “from\_bill\_section\_N” should be set to 1. This variable is also used in the main payments section, and is set to 0 when the payment comes from the main payments section.
- Set variable PAY002\_N = 1 for this payment. This is because this payment is a bill.
- The next screen to display is PAY001\_N. This is the screen we’re calling the “Super MCAT list”
- Ask the entire merchant categorization section and payment instrument follow-up section, exactly as if this were a payment reported on Days 1, 2, or 3.
- At the end of the last question of the merchant categorization questions and the payment instrument follow-up questions, display this screen:
